POND AN ALMANACK

for the Year of our

LORD GOD

1683.

Being the third after Bissextile or Leap-year, and from the worlds Creation at the Spring 5686 years Compleat.

Amplified with many good things both for pleasure and profit: and fitted for the Meridian of *Saffron-Walden* in *Essex* where the Pole is elevated 52 degrees and 6 minutes above the Horizon.

And may serve indifferently for any other place of this Kingdom.

CAMBRIDGE,

Printed by *John Hayes*, Printer to the Universitty, 1683.

The Common Notes and Moveable Feasts for this year, 1683. in both Accounts.

Julian or English.		viz.	Gregorian or Foreign.

Decemb.	2	Advent Sunday	Novem. 28

The Suns entrance into the four Cardinal Signs.

THe Sun enters *Aries*, this year *March* the 10 day, 54 min. past 8 beforenoon, at which time the figure of the Heavens will be as followeth, viz. 12 degrees of ♈ Ascending, 11 degr. of ♌ upon the Cusp of the 2 house, 22 degrees of ♐ upon the Cusp of the 3 house, 11 degr. of ♒ upon the Cusp of the 10 house, 5 deg. of ♓ upon the Cusp of the 11 house, and 27 degr. of ♈ upon the Cusp of the 12 house, &c.

He enters ♋ June the 11, 10 m. past 11 beforenoon.

He enters ♎ Septem. 13, 20 min. past 2 in the morn.

He enters ♑ Decem. 11, 26 min. past 2 afternoon.

THe Arriage comes in on the 13 day of January, and at Septuagesima Sunday it is out again untill Low-Sunday; at which time it comes in again, and goes out again the Sunday next after Whitsunday: thence it is forbidden untill Trinity-Sunday from thence it is unforbidden till Advent-Sunday: but then it goes out, and comes not in again till the 12 day of January next following.

The

The beginning and ending of the Terms.

Hillary Term begins January 23, ends February 12.
Easter Term begins April 21, ends May 29.
Trinity Term begins June 3, ends June 27.
Michaelmas Term begins October 23, ends November 28.

A Table shewing how many years Purchase a Lease or Annuity is worth at any number of years under 30, it worth presently, at interest upon interest, at six in the hundred, and shewing also how to purchase any Lease in being, and the true value of the reversion after any number of years.

Years of Lease	Years	Months	Decimals
1	0	11	0
2	1	9	8
3	2	8	1
4	3	5	9
5	4	2	5
6	4	11	0
7	5	7	8
8	6	4	5
9	6	9	9
10	7	6	5
11	7	10	7
12	8	4	6
13	8	10	9
14	9	3	6
15	9	8	5

The use and Explanation of this Table.

THe first Column at the left hand shewes the years of a Lease or Annuity, and right against each year are the years, months, and decimal parts of a months purchase that such a Lease or Annuity is worth.

Example.

Suppose a Lease or Annuity to continue 18 years, and you would know how many years purchase it is worth in ready mony, look in the Column of the years of a Lease, for 18 years, and against the same you shall find 10, 9, 9. which shews such a Lease to be worth 10 years, 9 months, and 9 ten parts of a months purchase. So that the yearly rent being 12 pound, the value will be thus found.

Years of Lease	Years	Months	Decimals
16	10	2	8
17	10	5	2
18	10	9	9
19	11	4	3
20	11	8	7
21	11	9	3
22	12	0	5
23	12	3	6
24	12	6	6
25	12	9	4
26	13	0	0
27	13	2	5
28	13	5	9
29	13	7	1
30	13	9	2

	10	9	9
10 times 12 is	120	0	0
12 in 9 mon. is	9	0	0
In 9 parts is	0	18	0
the value	129	18	0

But if you buy the Reversion of a Lease now, as suppose a Lease of 20 years continuance, and you commence not till 5 years be past, in this and such like cases, look for the present worth of the Lease, as this of 20 years, which will be found worth 11 years, 5 months, 7 tenths of a months purchase. Then look the present worth of a Lease of 5 years, which will be found worth 4 years, 2 months, 4 tenths, take this out of 11 y. 7 and there remains 7, 3, 2. which are 7 years, 6 months, 2 tenths of a months purchase; and so much is the Reversion of the Lease of 20 years, after 5 years worth be expired.

January hath xxxi days.

Full moon 3 day, 29 min. past 6 in the morning.
Last quarter 9 day, 6 min. past 7 at night.
New moon 17 day, 11 min. past 3 afternoon.
First quarter 25 day, 23 min. past 6 at night.

In this Month of *January* is Flegm much predominant, and therefore a Glass of white Wine now and then will not be amiss: also to eat the best Confections is very good and wholesom; also to drink Wine or Ale spiced with Grains, Ginger, Nutmegs, Cloves, &c. is greatly commended; also to take every morning about three hours before Dinner, a little Rosed Honey is very good to cleanse the Body of Choller and Flegm, but to fast long, or to let Bloud is not good this Month.

January 1683.

On the 10 day ☉ enters the Sign ♒, which is a Constellation of 24 Stars, and extendeth from the 21 degr. of ♒ to the 15 degr. of ♓, the former part of this Asterism is moist, the middle temperate, the latter part windy, the north part hot and foulery, but the latter part produceth wind and snow; it is of the Airy Triplicity, and of a masculine and sanguine temper, &c.

Note that the 12 Signs being divided into 4 parts, each part containeth 3 Signs, from whence comes the name Triplicity, these being 4 according to the number of the Elements, viz. Fiery, Airy, Watry, and Earthy, and so one fourth part of the Zodiack is said to be of the Fiery Triplicity, another of the Airy, &c. according as the Qualities of those parts agree with the Elements of Fire, Air, Water, and Earth: and also the Signs are said to be Masculine and Feminine according as heat and moisture, cold and driness, are predominant in them.

In this Month of *March* the Bloud begins to stir and increase, and therefore to preserve Health it is good to use pleasant and well spiced Meats, and all things that purge and cleanse the Bloud, but sharp Meats are to be avoided, but to drink the pleasantest and strongest Wine is commendable, as also to eat Green Leek Pottage, and to Bath also, it is good also to eat the Herb Pennyroyal, because it heats the Stomach, and so causeth better Digestion; as also the herb Betony is good for the Head.

In this Month of *May* it is good to Wash often the Face with fair running Water, as also to Bleed in any part of the Body, but especially in the Feet, because now the Blood hath its course down to them; to take Physick also to purge the Blood, it also very good, and to Sleep moderately after Dinner, but drink but little Wine, except Worm-wood Wine; Clarified Whey is also good for hot Stomachs. Sharp Drinks are also commended this Month, and to eat Fennel roots tenderly sodden.

May 1683.

In this Month abstain especially from such Meats as do engender Flegm; but drink the pleasantest Wine, and sometimes in a morning fasting a Glass of white Wine will not be amiss, because it purges Choler and all noxious Humours from the Stomach; also Lemons Sallets prepared with Vinegar, are good against any Humours which descend upon Kidnies; to eat Meats of light digestion is also much commended, but raw Milk, Cheese, and Apples are not counted so wholsom.

To eat ſtrong Meats, or thoſe which greatly nouriſh, or pleaſant Spiced Meats is not good in this Month, becauſe of the hotneſs of the Seaſon, neither is it good to Bleed unleſs neceſſity conſtrains, nor to purge; to drink much Wine is alſo hurtfull, becauſe it dries the Stomach and Liver, and increaſeth Choller, but the ſmalleſt Drinks are now beſt, faſting in the morning, alſo to eat Sage and Rue with a bit of Bread is good in a morning; but beware of eating Beets and Lettuce this Month, becauſe they are hurtfull.

In this Month doth Choller with Melancholly increase, from whence proceed Agues with burning Feavers, and other grievous Sicknesses hard to be cured; and therefore immoderate Exercises are in this Month especially to be avoided, as also Sleeping in the day, and Bleeding, Purging, or Vomiting are not good this Month: to eat Cabbage also is not counted wholesom this Month, because it engenders Melancholly, and causes the Ague in Most: but to drink a Glass of pleasant Wine, and to eat all Meats and Herbs cold of quality is good.

In this Month of *November* Melancholly much increaseth and Bloud decreaseth; it is good therefore and profitable to eat both Eggs and Honey, and to Vomit often, salt powdred Meats may also now be eaten without danger: but avoid Bathing, because now the Bloud is most especially most restrained within the Arteries, and Sweating in Hot Houses or Bathing, stirs up the Humors, and provokes distillation from the Head, and so causeth dimness of Sight, and pains in the Head: but to Purge and Bleed is now good, and to eat Milk and Pease, &c.

The use of this Table in Example.

King *Henry* 8 began his Reign in the year of *Christ* 1509, *April* 22 He Reigned 37 years, 10 moneths, and 2 days. It is since he began his Reign 174 years compleat the 22 of *April* this year 1683. Now to know the time since the end of his Reign, before his name standing on the right hand, you shall there find 136 years since he died, *January* 28. And so of the rest.

768.	713.	9241.	Bishopricks	2

The Explanation and use of the foregoing Table, with some observations of *England*.

THe Table consisting of several Columns, is plain and easie; in the first column towards the left hand, is a Catalogue of all the Shires in *England* and *Wales*, right against each of which, under their proper Titles, are the number of Parliament Men, Hundreds, Market-Towns and Parishes contained in the same, as also the Length, Breadth, and Circumference of the Shire, with the name of the Chief Town thereof, and its Distance and Situation from *Cambridge*.

As for Example,

I desire to know all the forementioned things, in or belonging to *Norfolk*, I look for *Norf.* in the first column (the Shires being in an Alphabetical order) and right against the same I find, 12 Parliament Men, 31 Hundr. 28 Market-Towns, 660 Parish. its length 50 mil. breadth 30, circumference 240, the chief Town *Norwich*, its distance from *Cambridge* 49 miles, and its situation from thence North East, signified by N. E. thus in like manner is to be done for any other Place.

England, being the Chiefest and pleasantest part of Great *Britain* is trebly divided, 1 into six Circuits destinated to the Itinerary Judges, 2 into 22 Episcopal Dioceses, 3 into 40 Shires; the Shires were first made by King *Alfred*, for the easier and speedy administration of Justice. This King also divided his Subjects into tens, or Tythings, every of which severally, should give bond for the good behaviour of each other: ten of the nighest Tythings made the Lesser division which we call Hundreds, which name cannot be derived from the number of Villages, none of our Hundreds being so large: these Hundreds are called Wards in *Cumberland*, *Westmorland*, *Durham*, *Northumberland*: in every Hundred there's a

a Constable called the Constable of the Hundred, who receives Warrants from the Sherriffs, or Justices, and dispatches them to the Constables of each Town and Village in his Hundred, for the effecting of publick businesses. To enumerate the plenties and ornaments of *England* requires more room than here is allotted, therefore it may suffice to express some of her Excellencies in these verses, *viz.*

England *is stor'd with Mountains, Bridges, Wooll,*
With Churches, Rivers, Women beautifull.

Of the Eclipses this year.

THis year there will be three Eclipses: one of the Sun and two of the Moon.

The first will be of the Sun on the 17 day of *January*, at 3 afternoon; it happens in 8 degrees of *Aquarius*, and may if the air be clear be seen by us in *England*.

The second will be of the Moon, the 1 day of *February*, at 3 afternoon, and therefore invisible as to us, the Sun being then yet within our Hemisphere, it happens in 23 degrees of *Leo*.

The third will be also of the Moon, on the 28 day of *July*, between 7 and 8 in the morning; it happens in 14 degrees of *Aquarius*, and cannot be seen by us.

The famous Conjunction of *Saturn* and *Jupiter* is also worth taking notice of, those Planets meeting twice or thrice this Year in the Regal Sign *Leo*, *viz.* on *January* the 30, and *May* the 2, &c. which as Astrologers say portend great alterations in the World.

Besides, also it is observable that the fiery Planet *Mars* corrupts the Sign of Justice from the 26 day of *November* 1682. to the 12 of *July* this Year, which is a Transit esteemed by Astrologers of mischievous tendency.

Prognosticks of Pestilential and unwholsom Years.

IT is observed by the Learned, that those Years are Pestilential and unwholesom, when there are great numbers of Frogs, Flies, Locusts, &c. the reason is, because those Creatures being ingendred of putrefaction, when they abound, shew a general disposition of the Year, and constitution of the Air, to Diseases of putrefaction: so likewise the same Prognostick holdeth, if you find Worms in Oak Apples; for the constitution of the Air, appeareth more subtilly, in any of these things, than to the sence of Man.

Great and early Heats in the Spring (and namely in *May*) without Winds, portend also pestilent Years: and generally so do years with little Wind or Thunder.

Great Drought also in Summer, continuing till towards the end of *August*, and some gentle Showers upon them, and then some dry weather again; do portend a pestilent Summer the year following: because about the end of *August*, all the Sweetness of the Earth, which goeth into Plants and Trees, is exhaled; (and much more if *August* be dry) so that then nothing can breath forth of the Earth, but a gross Vapor which is apt to corrupt the Air: and that Vapor by the first Showers, if they be gentle, is released, and cometh forth abundantly: therefore they that come abroad soon after those Showers are commonly taken with Sickness. And in *Africk*, no body will stir out of doors after the first Showers: but if the Showers come vehemently, than they rather wash and fill the Earth, than give it leave to breath forth pleasantly. But if dry weather come again, than it fixeth and continueth the corruption of the Air, upon the first Showers begun, and maketh it of ill Influence, even to the next Summer, except a very frosty Winter discharge it, which seldom succeeds.

The

The lesser Infection of the Small Pox, Purple-Fevers, Agues, in the Summer precedent, and hovering all Winter, do likewise portend a great Pestilence in the Summer following; for putrefaction doth not rise to its height at once.

A dry *March*, and a dry *May*, portend a wholesom Summer, if there be a showring *April* between: but otherwise it is a sign of a pestilential Year.

Furthermore, because the Air according to its situation doth much alter and change the Constitution of Mans body, and may breed pure and wholesom Bloud, or corrupt and bad Bloud, and malignant Humors. Therefore that you may know what Air is pure and sound, and what Air corrupt and infectious, we will add some Experiments, which the Judicious have observed, whereby you may conjecture how the Air is disposed; and that first,

A sound and pure Air is made hot presently after Sun rising, and is made cold presently after Sun-setting.

Which yieldeth a pleasant smell after Rain, clear and not evaporated, open and lightsom, where the North wind bloweth, and where the East wind bloweth in the morning.

A corrupt and infectious Air, is made by the often blowing of the South, or South-east-wind, or by the South-West, or West in the evening, which ingender Sicknesses.

Where the Air is cold long after Sun-rising.

Where the Air is long hot after Sun set.

Where the Air is long close, cloudy, or thick.

Of the Division of the World.

THE World, called by the *Greeks* Κόσμος, and in *Latine Mundus*, is Geographically divided into 4 parts, viz. *Europe*, *Asia*, *Africa*, and *America*.

Europe is bounded on the North with the *Northern Ocean*, and on the South with the *Mediterranean Sea*, on the East with the *Flood Tanais*, and on the West with the *Western Ocean*, and containeth these Provinces, *viz.*

Germany.	*Spain.*	*Swedeland.*	*Hungaria.*
Italy.	*Denmark.*	*Moscovia.*	*Sclavonia.*
France.	*Norway.*	*Polonia.*	*Græcia.*

The principal Islands are these, *viz.*

England.	*Ireland.*	*Candia.*	*Sardigna.*
Scotland.	*Sicilia.*	*Corsica.*	*Nigropont.*

The greatest Length of this part of the World is 3000 miles, and the Breadth 900 miles.

Asia is bounded on the North with the *North Ocean*, on the South with the *Red Sea*, and the Gulfs adjoining, on the East with the *East Indian Ocean*, and on the West with the *Flood Tanais*, whose principal Regions are these, *viz.*

Anatolia,	*Arabia.*	*Chaldea.*	*China.*
Syria,	*Media.*	*Persia.*	*India*, and the
Palestina.	*Assyria.*	*Parthia.*	*Islands* there-
Armenia.	*Mesopotamia.*	*Tartaria.*	of.

This part of the World is more famous than all the World in five Respects, *viz.* 1. for the Creation of Mankind, 2. for the Birth of our Saviour, 3. for His Miracles, and place of Suffering. 4. for the famous Monarchies of the *Babylonians*, *Assyrians*, *Medes*, and *Persians*, 5. for that it is the Common Mother of us all, it being the Place from whence innumerable troops of men issued to supply the vacuity of the inhabitable parts of the World.

Africa is bounded on the East with the *Red Sea*, on the West with the *Atlantik Ocean*, on the South with the *Southern Ocean*, and on the North with the *Mediterranean Sea*.

The Provinces are.

Ægypt, *Barbaria*, *Æthiopia*, *Nubia*, *Abassines*, *Monomotapa*,

The

The Islands are

Madagascar or S^t *Laurence*, S^t *Thomas*, *Insula de Cape verde*, *Insula de Canaria*, *Insula de Madera*.

America the fourth part of the World was altogether unknown to the Ancients, but by latter Observations is found to be bounded on the East with the *Atlantick Ocean*, on the West with the *West Indian Ocean*, on the North with the *Northern Ocean*, and on the South with the *Magellanick Sea*, consisting of two parts, viz. *Mexicana* and *Peruana*.

The Provinces of *Mexicana* are

Nova Hispania, *Terra Florida*, *Nova Albion*, or *New England*, *Californica*, *Norumbega*, *Nova Francia*, *Estotiland*.
